Ferric Carboxymaltose Use in Heart Failure with Reduced Ejection Fraction (HFrEF)

Presented by:

Lauren Gray, PharmD, BCCCP

Clinical Pharmacist Specialist – Cardiology, Billings Clinic

Session-Specific Objectives:

1. Identify an appropriate candidate for intravenous iron replacement
2. Describe the risk of treatment with ferric carboxymaltose
3. Weigh the pros and cons of ferric carboxymaltose with other available iron replacement strategies
4. Develop a treatment plan for a patient with HFrEF indicated for iron replacement

Series Objectives:

1. Discuss new and existing drug therapies
2. Describe the impact of literature and clinical guidelines on pharmacy practice
3. Explain safe and effective medication therapies for different disease states

Sponsored By: Billings Clinic CME Program

Accreditation Statement
