What about BOHB?

Practical Considerations for the Treatment of DKA in Adults

Presented by:

Jennifer Walker, PharmD, BCPS, BCCCP

Lead Clinical Pharmacist – Critical Care/Trauma Pharmacy Team, Billings Clinic

Session-Specific Objectives:

1. Describe the most common causes and pathophysiology of diabetic ketoacidosis (DKA) in adults
2. Explain the role of beta-hydroxybutyrate (BOHB) in the diagnosis and treatment of DKA
3. Discuss scenarios that may alter the normal course of treatment of DKA
4. Discuss criteria for resolution of DKA with tips for a successful transition to basal/bolus subcutaneous regimen

Series Objectives:

1. Discuss new and existing drug therapies
2. Describe the impact of literature and clinical guidelines on pharmacy practice
3. Explain safe and effective medication therapies for different disease states

Sponsored By: Billings Clinic CME Program
